

Would you like to get tested for sexually transmitted diseases such as HIV?※

※Sexually transmitted disease testing : To determine if a person has sexually transmitted infections.

I may have been infected with HIV....

I may have been infected through sexual intercourse.... I am worried...

Health centers in Shizuoka Prefecture provide testing for HIV, syphilis, hepatitis, and other diseases.

* The tests are free of charge(※)

※There is a fee for the issuance of a certificate (if requested).

* You do not need to disclose your personal identity to undergo the examination.(※)

※A person who wishes to undergo a hepatitis test only must give his/her name and address.

* The test will determine if you have been infected with the disease for about 3 months or more from the date of testing.
